
Purposeful, contemporary and comfortable inside & out.

Contemporary & purposeful living spaces.

The architectural forms of Terza have been balanced to reflect an urban West Coast way of life. A modern facade blends modern panel, brick and wood in the exterior finishes, and the rooftop decks take advantage of the surrounding views to give you a spectacular place to unwind and relax.

Homes

Bright and spacious interiors reflect the contemporary style of city living and the essence of the greenspace around it. Together, they create homes with an effortlessly elegant style, distinctly modern and welcoming in every sense.

Intelligently Designed.

The homes have been intelligently designed to the highest B.C. Building Code Step 4. Terza is net-zero-ready and will save homeowners up to 50% in energy efficiency and sustainability compared to traditional homes with features such as an exceptional building envelope, mechanical systems and air conditioning all built-in.

Distinctive style accommodates every need of modern family living. The open concept designs give everyone their own spaces to retreat when they want as well as create great gathering spaces to hangout and spend time together.

Take a tour of the home you've been waiting for.

VIRTUAL WALKTHROUGH

Terza embraces the lifestyle that is only found on the North Shore.

Naturally urban.

Nestled in the heart of North Vancouver just steps away from parks, schools, recreation and urban conveniences of the Lonsdale Quay, the contemporary design of every home gives you a truly unique lifestyle that is only found on the North Shore.
