HOMES BUILT TO LAST

The Rockwoods was designed to create a community that families would aspire to live in for years to come. Exterior and interior design and construction details were a crucial focus in the development of The Rockwoods. Each townhome features Westcoast contemporary architecture, weaving timber and stonework for superior design. These homes offer clever uses of space that provide form as well as function and ample room to grow. Location, affordability, function and design are the principles that The Rockwoods was built on. Anthem Properties' vision and dedication creates real estate that works and welcomes you home.

DEVELOPER

CREATING REAL ESTATE THAT WORKS. That's what Anthem Properties has been doing successfully since 1991, with over 210 projects under our belt valued at over one billion dollars. It is both our goal and our purpose. Creating Real Estate that Works requires a clearly defined vision based on our core values of creativity and straightforward communication. We judge our efforts to be successful only when we have satisfied the needs of our homeowners and neighbours in the communities where we develop, as well as our desire to create great space. Currently located in over 22 towns and cities across BC and Alberta, we're proud to be caring neighbours and valued partners in your community.
