FOUNDERS BLOCK

NORTH

BUILDING A BLOCK

Aligning with the North Shore style, West Coast Contemporary architecture is expressed with wood siding, roof overhangs, and light brick. Great design runs deeper than style here, with homes being built to LEED Gold sustainability standards, and live/work or legal secondary suites included in some homes to help with mortgages, house grandparents or achieve your business dreams. Founders Block North is designed for tomorrow.

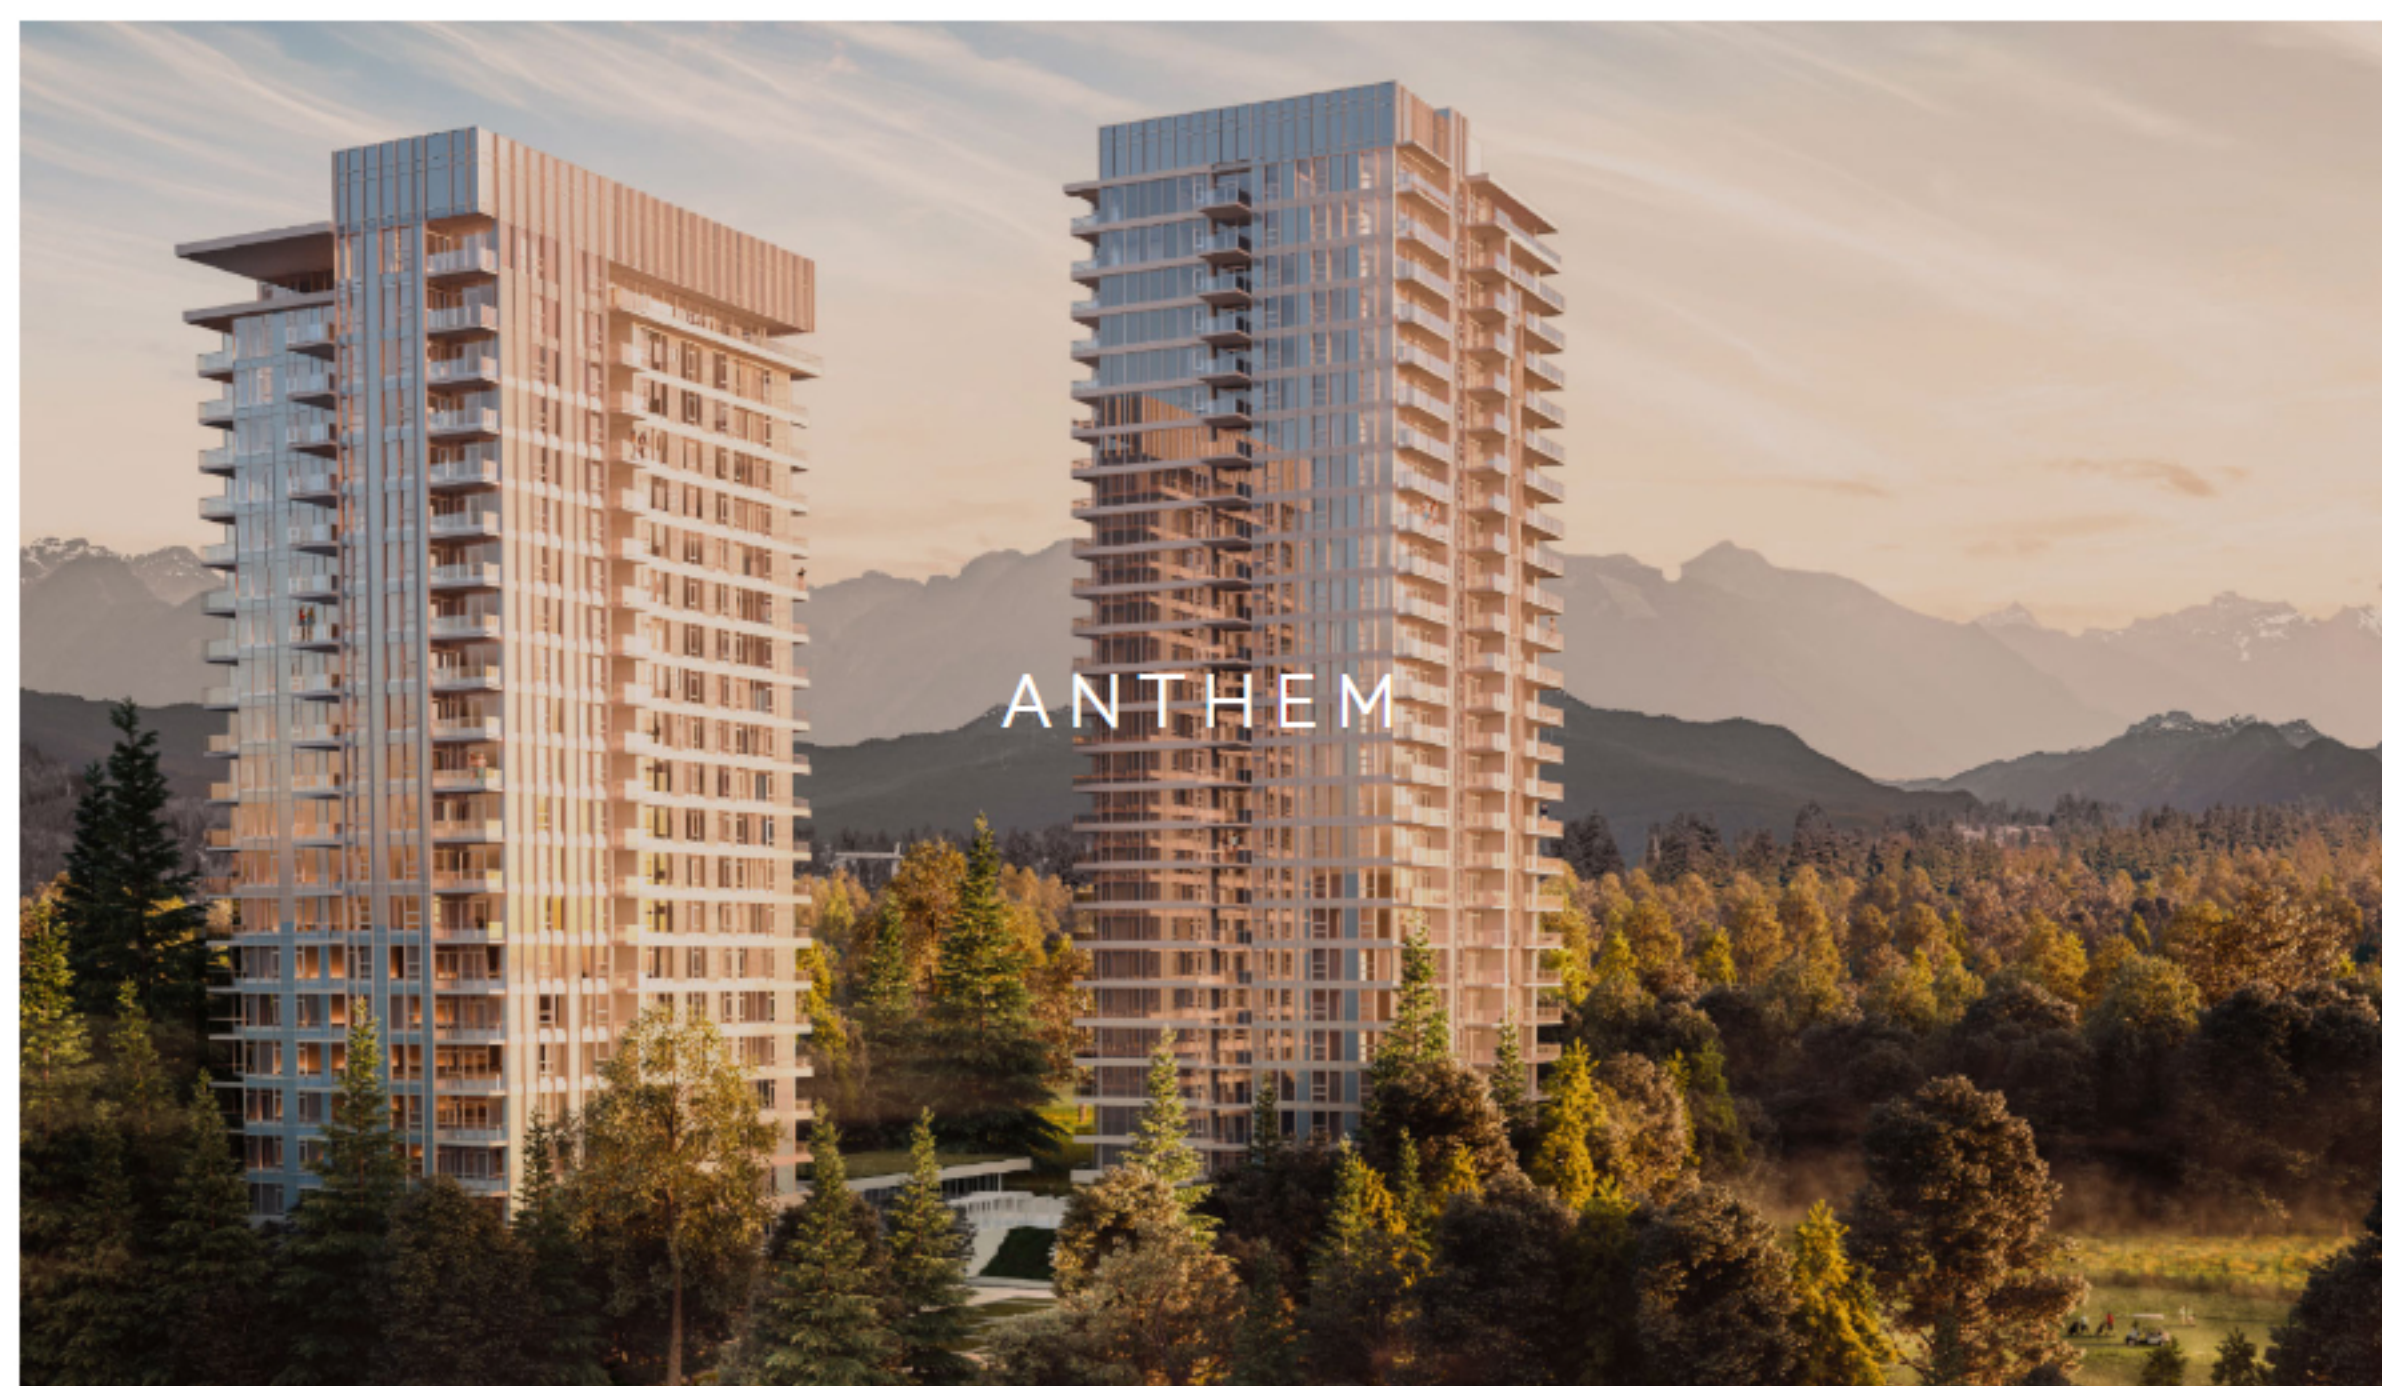

SMARTER LIVING SPACES

Designed for you to enjoy more everyday ease, homes include functional, open-concept layouts and clever storage solutions. Scandinavian-inspired interiors combine design-forward details with a neutral colour palette to create a warm feeling of home. Select homes offer direct access to the secure underground parkade and all homes are constructed to LEED Gold sustainability standards, creating more comfortable and smarter living spaces for growing families.
