Light House is a new development coming soon to Aragon Properties' 52-acre Port Royal Village community in New Westminster. The sought-after neighbourhood features access to the waterfront, stunning views, lush parks and ample walking trails. Sales at Light House are expected to start later this year and prospective homebuyers can register online for the latest updates and releases.

Light House is located on the Fraser River between Annacis

Island and Downtown New West, in the southern part of the Port Royal Village. The quintessential West Coast community offers all the amenities of an urban centre combined with a vibrant waterfront setting. The established master-planned community is dotted with local attractions including the 6.5-acre Port Royal Park. This picturesque greenspace features a picnic shelter, trellised plaza, playground, fountain and dock. The 1.7-kilometre Riverfront Walk connects with the area's network of foot and bike paths, a sand beach and a lookout to Poplar Island.

Meanwhile, the Port Royal Community Garden offers a gathering space for neighbours with public plots for residents to grow fruits, vegetables and herbs. A five-minute drive west of the development will find you in the middle of a major retail and entertainment centre packed with cafes and big-box stores including Starbucks, Walmart Supercentre and Lowe's Home Improvement. This area is also home to the Starlight Casino, which hosts a diverse range of entertainment from the usual casino games and slots to live performances, electric DJs and several gourmet dining options.

Although floorplans haven't been released, homebuyers can expect to see a collection of one- to- three-bedroom loft-style residences with spacious, open-concept layouts. Amenities include a party room, private dining room, gym facilities and lounge areas.
